Norway is connected to the EU in many ways

# The important role of the consumers

- Consumers are active and central players
- 25 years of experience with a deregulated power market
- Digital technologies – will empower the consumers

# Energy efficiency first – what does it mean in Norway?

# Norwegian energy-intensive industry

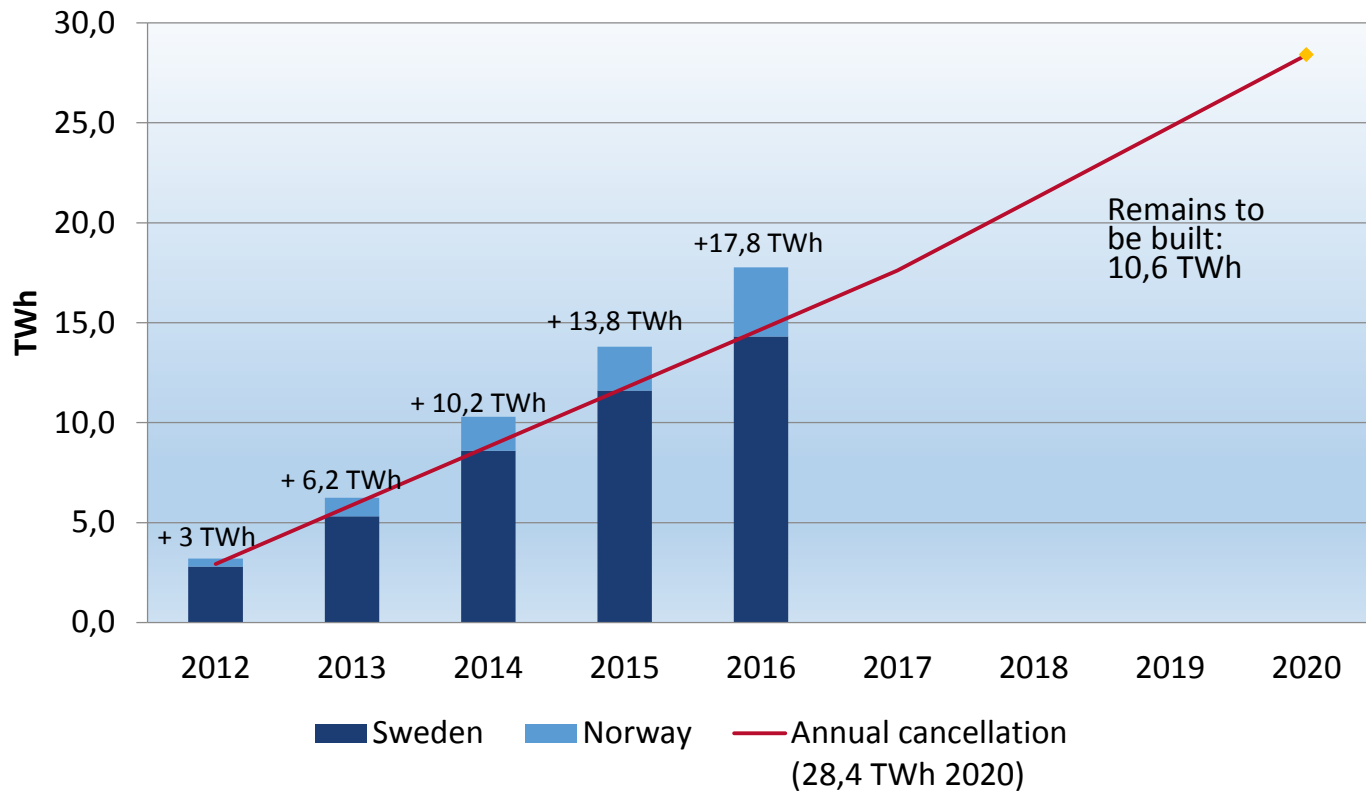

# Renewable energy targets 2020

# The Swedish-Norwegian elcert scheme +28,4 TWh

# More than 6 TWh under construction in Norway

- 4,2 TWh vind

# Large potential for more electricity generation

# Governance – how should that apply to Norway?

Thank you for your attention!

Mari Hegg Gundersen
