

## Invitation

### **Nordic Forum on Energy Solutions**

20<sup>th</sup> of October 2009 in Estonia, Tallinn

The Nordic Council of Ministers' Office in Estonia has the pleasure to invite you to a Nordic Forum on Climate and Energy Solutions on October 20, 2009, in Tallinn's Solaris Keskus.

The aim of the Forum is to promote the development of renewable energy through knowledge sharing, thus enhancing Nordic-Baltic cooperation.

Halldór Ásgrímsson, the Secretary-General of the Nordic Council of Ministers, will talk about Nordic Climate Solutions and energy efficiency, with renewable and intelligent energy being important keywords. The Nordic countries generate 63 percent of their electricity from renewable sources and no other region in the world can match this so far.

PhD Rurik Holmberg will present a research study on the possibilities of Nordic-Baltic bioenergy cooperation and proposals for closer cooperation between Nordic and Baltic researchers.

The research study has been conducted by the Technopolis Group as a joint project initiated by the NCM Offices in Estonia, Latvia and Lithuania.

The official language of the Forum is English.

### [Registration online](#)
